

Diagnostic & Laboratory Solutions

Automated Ecosystems for Accurate and Efficient Results

Complete laboratory ecosystems featuring automated chemistry analyzers, hematology systems, and comprehensive IVD solutions tailored for Ethiopian healthcare facilities.

Key Features & Benefits

Key Features

- ✓ Mindray BS-240 Chemistry Analyzers
- ✓ Mindray BC-5150 Hematology Systems
- ✓ High-Precision Digital Microscopes
- ✓ Comprehensive Lab Furniture Solutions
- ✓ Integrated Quality Control Systems & Reagents

Benefits

- ✓ Increase patient throughput with automated workflows
- ✓ Reduce diagnostic errors by 85% with reliable results
- ✓ Accelerate staff competency with comprehensive training
- ✓ Minimize equipment downtime with 24/7 technical support
- ✓ Ensure consistent and traceable results

Technical Specifications

Chemistry Analyzer:	Up to 240 tests/hour throughput	Hematology System:	5-part differentiation, 60 samples/hour
Sample Types:	Serum, plasma, urine, whole blood	Data Management:	LIS/HIS connectivity with HL7 protocol
Reagent System:	Refrigerated reagent positions, barcode reading	Optical System:	Advanced LED illumination microscopes
Installation:	Full setup, calibration, and method validation	Support:	On-site user training and remote diagnostics
